

International Midwifery educator for NMTI

Background

Jhpiego is a non-profit global health leader and Johns Hopkins University affiliate that is saving lives, improving health and transforming futures. We collaborate with governments, health experts and local communities to build the skills and systems that guarantee a healthier future for women and families. Jhpiego translates the best science and practice into moments of care that can mean the difference between life and death for women and families. The moment a woman gives birth; the moment a midwife helps a new born to breath. Through our partnerships, we are revolutionizing health care for the world's most disadvantaged and vulnerable people.

In India, Jhpiego works across various states in close collaboration with national and state governments, providing technical assistance in the areas of family planning, maternal and child health, strengthening human resources for health, and non-communicable diseases. These programs are funded by USAID, Bill & Melinda Gates Foundation, David & Lucile Packard Foundation, Children's Investment Fund Foundation (CIFF), MSD for Mothers and others.

Jhpiego is hiring for the position of International National Midwifery Educator based at Wardha, Maharashtra, India for its BMGF funded project "Facilitating and providing technical assistance in establishing 'Nurse Practitioners in Midwifery' and 'Midwifery-led Care Units' to transform maternal and neonatal health care in India". The position will work closely with Nursing Institute, national Midwifery Educators and Jhpiego for Nurse Practitioner Midwifery (NPM) Educator Program.
